

Nanotechnology Symposium VI

Progress IN Protection

Nanotechnology VI will summarize Engineered Nanomaterial Environmental Health & Safety issues and provide an overview of what EH&S practitioners can do to protect their workers now and in the future, where the discipline is heading, and what areas require additional research.

Cosponsored by

Center for Environmental
Implications of Nanotechnology

Department of
Toxic Substances
Control

October 13 • 9:00am-4:30pm
California NanoSystems Institute
University of California Los Angeles
570 Westwood Plaza
